TRUSTED INTERNET

NIST 800-171, SPRS, CMMC

WE ARE THE "ADT" OF CYBER SECURITY

PROTECT YOUR BUSINESS OR HOME

WHO WE ARE

Trusted Internet is an established provider of comprehensive Cyber Security solutions, comprised of experienced Virtual CISO™ staff, former large enterprise cyber security and compliance consultants, and our own 24/7 Cyber Security Operations Center.

We provide monitored and managed detection and response services to small-to-medium-sized businesses (SMBs), covering approximately 171 technical controls required under NIST 800-171, SPRS and CMMC.

WHAT WE OFFER

- Cyber Security Risk Assessments
- 24/7 Monitoring and Incident Response
- Strategic Consulting via Virtual CISO®
- Augment your IT staff or service with our on-demand cyber expertise
- Security Operations Center (SOC) as a Service
- Federal and DoD Standards Compliance

HOW WE OPERATE

We will conduct an initial assessment of your cyber security risks and current solutions. We will then discuss with you how our security solutions can initiate or augment a high standard of monitored and managed cyber security.

We leverage a scalable core reference architecture composed of advanced technology capabilities, backed by machine learning, artificial intelligence, and real people around the clock. We rapidly identify critical threats in real-time, giving us an edge in rapid response and reporting.

We can provide you with a full or tailored suite of security appliances, endpoint security, and our signature 24/7 monitoring service that includes blocking suspicious activity, patching vulnerable systems and quarantining infected systems.
